**Gensler**

---

Keith Thompson is a registered Architect with over 35 years of planning and design experience assignments at more than sixty airports worldwide. His experience in aviation facility planning and design includes project and program leadership with an emphasis on terminal and landside design and planning. Mr. Thompson has provided design and technical leadership on a majority of the Gensler aviation portfolio, most recently on the executive team for the \$700M Midfield Satellite Concourse project at LAX, as Project Director on the recently completed \$250M Terminal C project at John Wayne Airport, and as the collaborating design architect of the four million square foot Terminal 2 at Incheon International Airport currently under construction.

In addition to winning the design competition for Incheon's Terminal 2, he has helped focus Gensler's global aviation practice by participating in design competitions for Singapore's Terminal 4, the new Mexico City International Airport, and Harbin, China. Other recent international project wins include terminal design projects in Auckland, New Zealand, Guam, and planning of terminal facilities for a new international metropolitan airport in Costa Rica.

He has been both chair and co-chair of the Airport Consultants Council/ British Airports Group (ACC/BAG) Global Business Summit from 2011 to the present.
