

## ACI Global Training Instructor Biography

---

**Ing. Samuel K. Asare**

**Course:** ACI-ICAO Global Reporting Format (GRF)

---

Samuel is a Transportation Engineering Consultant and Facility Manager at Ghana Airports Company Ltd, responsible for provision and management of Airports in Ghana. He has developed and implemented training programmes for in-house personnel in areas such as pavement condition surveys and in-house capacity building training for industry players.

Samuel has close to 2 decades of work experience across Engineering, Facility Management and Aviation. He has worked in senior management and operational roles in mining, Sea Ports, Road Transportation and Aviation Industries.

Samuel has in-depth professional practice in Civil Engineering and management of Airport Terminals, Boarding Bridges, Airfield Pavement Infrastructure, Runway and Aerodrome Safety, Aviation Security Infrastructure, Service roads, car parks and access control systems, Aerodrome certification requirements, Airport Services Quality(ASQ) requirements, requirements for ACI Health Accreditation programme, General Services, Technical Services, and ACI-ICAO protocols for Airside and Airport Terminals.

Further, he is experienced in procuring and managing Cleaning & Janitorial Services, General Sanitation & Environmental Services, Covid-19 protocols and Disinfection Services against infectious diseases, Landscaping/Horticultural Services, Maintenance/Service contracts, Service Level Agreements, Works & Services Procurement Management, Framework Agreements, contracts negotiation and administration, water supply for the Terminals and Airport Stakeholders, among others.

Prior to joining the Aviation industry and as an Adjunct Lecturer of the Central University, a private university in Ghana, he was responsible for delivering transportation engineering courses for undergraduate students of the Civil Engineering Department for about 6 years.
