Roddy Boggus is a Vice President and the Aviation Buildings Service Group Leader at RS&H. He has more than 30 years of aviation-specific experience in multidisciplinary practices for U.S. and global organizations. Roddy has been a business and Practice Leader with demonstrated business line growth through exceptional industry visibility, business development skills, and collaborative team practices. He has proven success in project claims resolution, resulting in customer satisfaction and client retention. He excels in both airline and airport based practices and alternative delivery methods. He also has a strong background in aviation/airport security, including product development, regulatory guideline contributions, design, and pragmatic deployment of existing technologies. Roddy is a functional/operational facilities expert serving multiple large and medium hub airports on streamlining and providing exceptional level of service for passengers and stakeholders through passenger flow, queuing, and operational efficiencies.

Roddy is an architect with a Bachelors of Design from Texas Tech University. He was the 2017 Board Chair of the Airport Consultants Council (ACC) and sits on the Board of Directors for the International Partnering Institute (IPI), as well as the International Association of Airport Executives (IAAE).
