

ACI Global Training Instructor Biography

Mr. Paul HOOPER
Course: *Airport Carbon Management*

Dr. Paul Hooper is a senior lecturer at the Manchester Metropolitan University. He holds a BSc in Chemistry, a Masters in Pollution and Environmental Control and a Doctorate in Industrial policy for clean technology (University of Manchester). His research interests include environmentally sustainable industrial policy and practice with a particular focus on the development of cleaner technologies and the role of environmental management systems in delivering change to organisational priorities. His current research focuses on three aspects of aviation: waste management, public consultation associated with airport development and environmental management and reporting in the world airline industry. He has recently prepared best practice guidance on many of these issues for the International Air Transport Association in Geneva.

Dr. Hooper is one of the main facilitators for the ACI “Airport Environmental Management” course.
