

Tine Haas – Director Airports & Aviation

Tine leads the aviation practice at Dornier Group with a strong focus on decarbonising airport operations. She is a Chartered Professional Engineer (CPEng) with over 20 years' experience in the transport sector working with airport operators, airlines, investors, municipalities and financial institutions in Europe, Asia, the USA and New Zealand. Tine has comprehensive knowledge of intermodal transport planning and airport development including the impact and requirements of charging infrastructure for electric fleets and autonomous driving on airport access and infrastructure. Tine advocates for collaborations between urban planners, transportation engineers, technology providers and citizens to find sustainable climate-friendly solutions. She frequently shares her ideas on new technologies and best practices at conferences and as moderator of workshops. Her active contributions as WBP to the ACI EUROPE Commercial Forum as well as the Technical and Operational Safety Committee were recognized by her peers with the ACI Europe Best WBP Award in 2021. She is also a member of the ACI World Safety and Technical Standing Committee.

Dornier Consulting is part of the Dornier Group and provides consulting and engineering services in the aviation, rail, mobility, renewables, real estate, and water sectors.
