

ACI Committee Forum

Aircraft Noise Mitigation Workshop: 19 June 2024, Montreal

Program

Objectives

This Aircraft Noise Mitigation workshop will delve into the multifaceted dimensions of mitigating aircraft noise at airports, focusing on both the Quality of Life in communities near airports and the ICAO Balanced Approach implementation. Discussions will explore non-acoustic factors affecting community well-being, the challenges posed by night flights, and insights from the upcoming publication on ICAO Balanced Approach implementation.

At the end of the workshop, participants will be better equipped to devise holistic strategies addressing aircraft noise, integrating non-acoustic considerations, and aligning with the principles of the ICAO Balanced Approach, ultimately fostering enhanced community satisfaction and sustainable aviation operations.

How the Workshop is structured

This workshop consists of interactive discussions and expert presentations aimed at fostering a deeper understanding of aircraft noise mitigation challenges and solutions. Participants will engage in knowledge and experiences sharing, as well as brainstorming to explore innovative approaches and best practices in addressing aircraft noise at airports.

Audience

Any ACI member airport representative or World Business Partner, at any level, who is involved or interested in challenges and opportunities related to noise mitigation at airports.

All ACI World Committee members and World Business Partners are welcome.

Aircraft Noise Mitigation Workshop

Hilton DoubleTree Hotel, 1255 rue Jeanne Mance
